DETAILED ACTION

Upon reconsideration and in view of the action which follows herein, the requirement to elect species is hereby withdrawn.

RESTRICTION REQUIREMENT

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-43 are, drawn to a rotary disk refiner and plate segment, classified in class 241, subclass 261.2.
- II. Claims 44-64 are, drawn to a method of making a refiner plate segment, classified in class 29, subclass 407.01.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method may be used various tools capable of being made utilizing a measuring/testing/machining protocol, as for example, a milling or grinding tool.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3725

Any inconvenience caused applicant by the imposition of this action is regretted, but upon review and consultation, restriction for examination purposes is deemed proper.

Any inquiry concerning this communication should be directed to Waymond Bray at telephone number 308-1871.
